

## Module of printing Gespage Mobile

Gespage Mobile module is in the Gespage MFP license and provide a service for sending documents to print from any connected equipment, PC, Smartphone, Tablet.

### Key points

- Printing from any connected terminal (PC, smartphone, tablet...).
- 3 ways to submit print jobs: via Android and iOS applications (iPhone & iPad) for smartphone and tablet, from a web page, by email.
- No print driver installation and secured access to the service.
- A secured multilingual platform (HTTPS/SSL format) enables the user to authenticate and create his account.
- Printing of files (PDF, Microsoft Office, Open Office, Image...) and web pages.

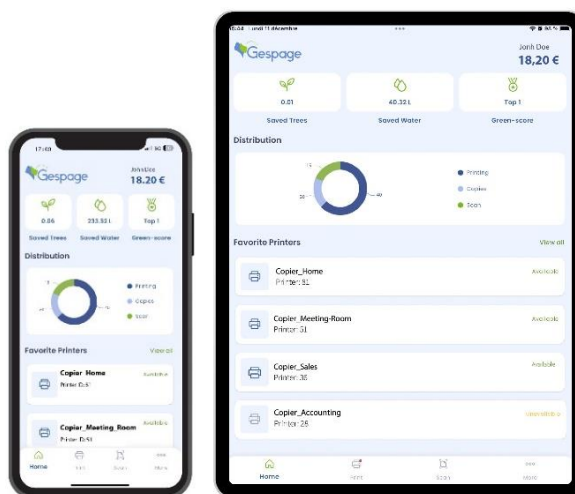

# Mobile App

With the complete overhaul of the Gespage mobile application, optimize your productivity and simplify your printing processes, while remaining aware of your environmental impact.

The application allows you to:

- Easily check your user account information and print usage.
- Stay informed of your environmental impact through the app.
- Print your documents and images directly from the app or the Print menu in one of your apps.
- Customize print settings such as paper size, number of copies and double-sided printing to suit your needs.
- Quickly free up your print jobs on your multifunction printer (MFP) by using a QR code for added security
- Effortlessly scan documents directly from the app.

The app is available on Android and iOS platforms for phones and tablets.
